

2 Paint Department Output

MAXIMIZE THE OUTPUT OF YOUR PAINT DEPARTMENT

Increased Sales and Profits resulting from Less Wasted Time and Increased Daily Output

- Measurement of Vehicles per day, per booth and Booth Cycle Time
- Paint Department Process Audits by our Technical Consultants
- Technical Support to standardize Paint Department processes
- Eliminates bottlenecks, delays and re-dos

The Paint Booth is the Locomotive of the Production Train and the Narrowest Constraint
It is premium floor space as every vehicle must pass through it

IF YOU WANT TO MAXIMIZE DAILY OUTPUT (RO'S); YOU MUST REDUCE BOOTH CYCLE TIME

$$\text{BOOTH CYCLE TIME} = \frac{\text{MONTHLY BOOTH OPERATING HRS.}}{\text{MONTHLY RO'S PRODUCED}} = \frac{21 \text{ DAYS X } 9 \text{ HOURS PER DAY}}{82 \text{ RO'S}} = \text{2.3 Hours}$$

Benchmark = 1.8 Hours

- First Things First - Get Your House in Order
- The Three Offline Processes
 - > Repair Planning
 - > Color Mixing & Matching
 - > Parts Edging Process
- Five Online Processes

WE ARE A DIFFERENT KIND OF DISTRIBUTOR:
